PROFESSIONAL SUMMARY :

MCA candidate with a background in software development, Python, SQL, machine learning and REST API development. Experienced in developing backend APIs, relational database workflows and full-stack applications using React.js, Node.js, Express.js and MySQL. Familiar with MLOps and cloud concepts including Linux, Git/GitHub, Docker, CI/CD, AWS, machine-learning model deployment, monitoring and the ML lifecycle. Seeking an entry-level MLOps / Machine Learning Engineer opportunity to apply software engineering and machine-learning skills to production-oriented ML systems.

EDUCATION :

Sinhgad Institute of Management <i>Master of Computer Applications (MCA)</i> CGPA: 8.0310	2024 – 2026
Sinhgad College of Science <i>Bachelor of Computer Applications (BCA)</i> CGPA: 8.44/10	2021-2024
Higher Secondary Certificate <i>12th Standard</i> percentage: 78.67%	2020-2021
Secondary School Certificate <i>10th Standard</i> percentage: 70.40%	2018-2019

TECHNICAL SKILLS:

Programming: Python, SQL, JavaScript

Machine Learning & Data: Pandas, NumPy, Matplotlib, Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Regression, Model Evaluation

MLOps & DevOps: Git, GitHub, Docker, CI/CD, REST APIs, Model Deployment Concepts, Model Monitoring Concepts, ML Lifecycle

Cloud & AWS: Amazon Web Services (AWS), EC2, S3, ECR, IAM, VPC, CloudWatch, Lambda, SageMaker

Backend: FastAPI, Node.js, Express.js

Databases: MySQL, MongoDB

Linux & Tools: Linux, Bash, Git, GitHub, Postman, VS Code

Frontend: React.js, HTML, CSS, Tailwind CSS

EXPERINCE:

Evolware Solutions | *Software Development* | **Current**

- Developing and maintaining full-stack web applications using React, Node.js, Express.js and MySQL.
- Working on KonkanTrip, a hospitality management platform covering property operations, rooms, inventory, pricing and related management workflows.
- Developing ERP modules and REST APIs with focus on CRUD workflows, database consistency, reporting and responsive UI.

Eclerx | *Analyst* | **oct-2025 – April - 2026**

- Provided customer support through chat for BPO operations, handling customer queries and resolving issues through written communication.
- Assisted customers with account, service and process-related queries while maintaining accuracy and professional communication.
- Handled multiple customer conversations efficiently while following process guidelines, maintaining response quality and meeting support requirements.

PROJECTS :

ERP Management System | *React, Node.js, Express.js, MySQL, Tailwind CSS*

- Developing an ERP system with modules for sales, purchases, expenses, billing, credit and reporting.
- Implemented REST APIs, CRUD workflows and relational database operations for business data.
- Designed responsive interfaces and management dashboards with focus on accurate reporting and consistent data flow.
- Deployed the application on a Hostinger VPS, configuring the server environment, backend application and database connectivity.
- Managed application configuration and environment variables for the deployed application.

KonkanTrip — Hospitality Management Platform | *React, Node.js, Express.js, MySQL, REST APIs, Tailwind CSS*

- Developing a full-stack hospitality platform for property, room, inventory, pricing and operational management.
- Implemented backend APIs and relational database workflows for rooms, beds, inventory transactions, pricing and related modules.
- Built dashboard and management workflows with emphasis on data consistency and frequent operational updates.
